

Falsifying the Idea of Electrical Scarring of Giant Landmasses

Jeffrey J Wolynski

February 7, 2013

Jeffrey.wolynski@yahoo.com

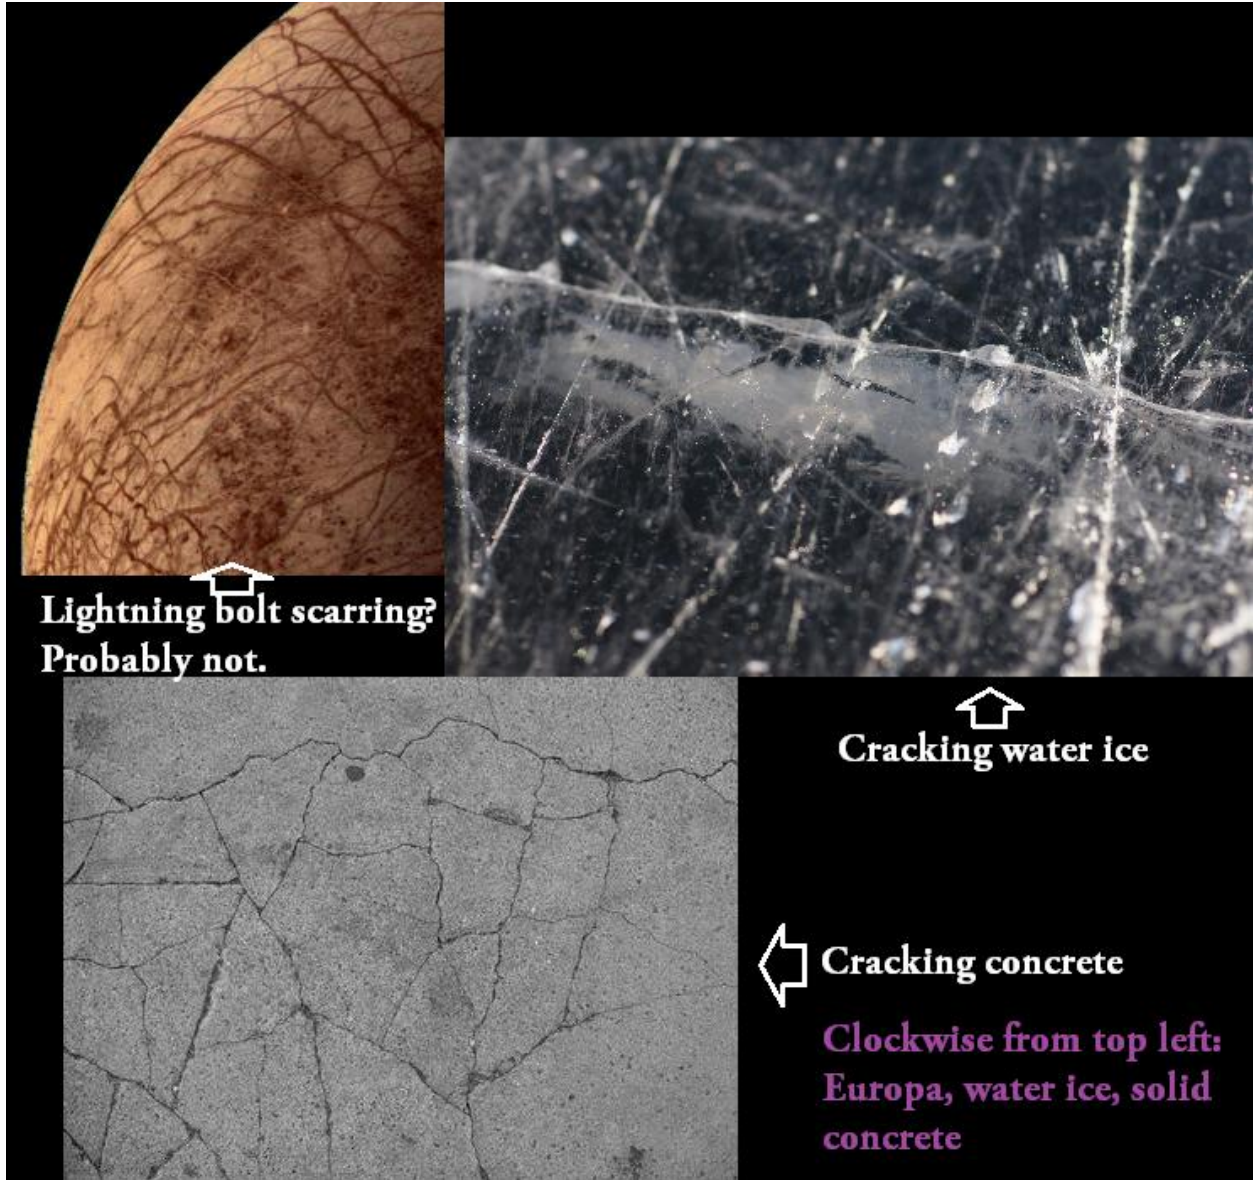

Abstract: It is believed by proponents of plasma cosmology and electric universe that lightning forms large gashes in landmasses. The author can demonstrate this to be false. Pictures are presented below to illustrate this reality.

Electric Universe followers want you to believe this dried up tributary in Yemen is caused by "electrical scarring". We can clearly see that water caused this "scarring". It is a mechanical process called erosion.

← The Chesapeake Bay

From these pictures we can conclude that “electrical scarring” is arbitrary and unnecessary to explain the occurrence of patterns on landmasses. Electric Universe followers want people to believe that lightning cracks concrete and ice when you are not looking.
