

"Dedicated to Mr. Erik Margan for placing the good for humanity and All Kind before any type of profit and providing the author together with his spiritual father Alan Zeeper with the most crucial data required for their no! our endeavour ..."

$E=V^3\Lambda$ as $m=V/\pi$ and $E=mV^2\Lambda$ is $E=mQ^2$

m =Electrical-Mass or Planck Mass 10^{-8} kg (it's Pressure forms Gravity)

V =Volt 10^{-35} m (V is a unit of circumference)

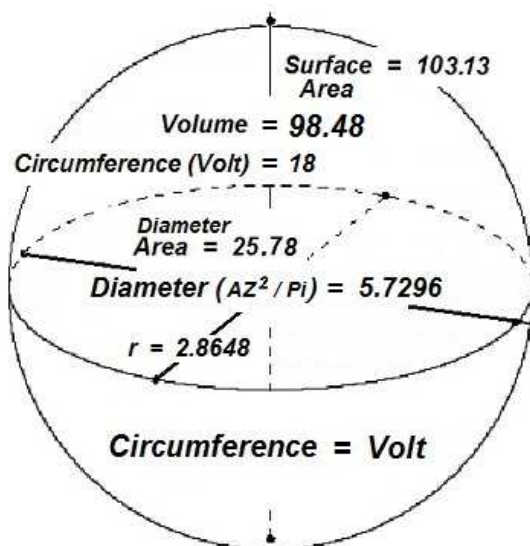

Λ =Einstein's Cosmological Constant 10^{86} s^{-2} π/Tp^2 (Antigravity)

$V^2\Lambda=v^2$ velocity squared or c^2 in Planck Terms

$V\Lambda=gp$ Planck Acceleration or Gravity, Tp =Planck Time

$V^3\Lambda=\sqrt{chG}$ or Planck Acceleration over the Planck Area. **Organic GROWTH** referred to as dematerialized or spontaneous production of Energy, Golden ratio proportioning Q =the quantum speed of thinking in the human brain (in quantum steps per second)

$Q^2=V^2/\pi^2 \times \pi^2\Lambda=$ Velocity squared (pure Mathematics and Geometry)

$$\text{Farad} = \frac{\text{mass} \times r}{\text{Diameter Area}}$$

$$\text{Farad} = \frac{m \times 2 \times \text{Diameter}}{\text{Surface Area}}$$

Energy	=	$m A^2 Z^2$	=	36
Velocity²	=	$A^2 Z^2$	=	36
Power	=	$m A^2 Z$	=	12
El. Mass	=		=	1
Accel.	=	A	=	2
Time	=	Z	=	3
Coulomb	=	$m A$	=	2
Volt	=	$A Z^2$	=	18
Amp	=	$m A / Z$	=	2/3
Weber	=	$A Z^3$	=	54
Velocity	=	$A Z$	=	6
Tesla	=	$1 / A Z$	=	1/6
Heat	=	$A^2 Z^3$	=	108
Farad	=	m / Z^2	=	1/9
Ohm	=	Z^3 / m	=	27
Surface Area	=	$4\pi r^2$	=	103.13
Diam. Area	=	πr^2	=	25.78
Diam. Area²	=	$A^2 Z^4 / \pi^2$	=	32.83
Volume Cube	=	$A^3 Z^6$	=	5832
Volume Sphere	=	$4/3 \pi r^3$	=	98.48

(Farad above is for this particular energy sphere.)

Picture 1: Alan Zeeper <http://www.einsteingravity.com/> who combined Electromagnetism with Gravity.

See next page for more Planck Quantum Geometry!

$E_p = M_p c^2$ is the same as $E = m Q^2$

E_p = Planck Electrical Energy

c = the speed of light only on the planet Earth

Q = the quantum speed of thinking in the human brain (in quantum steps per second) = Volume of a sphere on the Planck Quantum level

M_p = Planck Mass (it's pressure forms gravity)

$Q = \text{Temperature} \times \text{Heat} \times \text{Linear Time} \times \text{Angular Time}$

$Q = g_p T_p \times g_p^2 T_p^3 \times T_p \times T_p = g_p^3 T_p^6 = \text{Volume of a sphere}$

g_p = Planck Acceleration (c^2 / L_p at $(1/6)^{37} \times 10^{-6}$ m)

T_p = Planck Time

L_p = Hamid-Planck Length $(1/6)^{37} \times 10^{-6}$ m calc. without c, \hbar, G

Once we have a Planck Mass and a Planck Volume, we can calculate Planck Density, Planck Pressure and finally Planck Electrical Energy = Planck Volume x Planck Pressure or Planck Mass x Pressure / Density

***Planck**

$E = m Q^2$ & $E_p = \sqrt{Q}$ Quantum Consciousness

Q = the quantum speed of thinking in quantum steps per second and the pressure of the electrical-mass on the neuron density in the human brain

q = Electrical-Mass or M_p Planck Mass

g_p = Planck Acceleration

L_p = Planck Length at $(1/6)^{37} \times 10^{-6}$ m*

pp = Planck Pressure

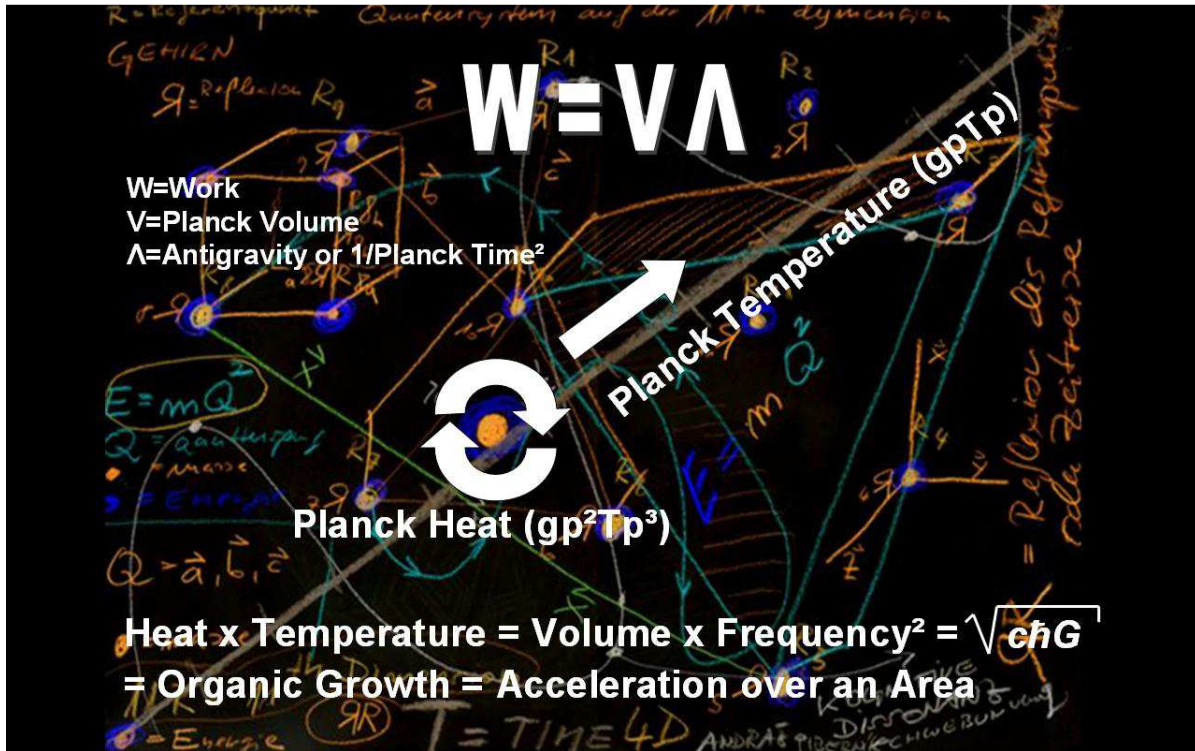

pp = Planck Density

$E_p = q \sqrt{(g_p \times L_p \times pp / pp)}$

*quote: Hamid from Iran

"To my first, paternal side Persian teacher and academic tutor Ass. Prof. Mag. Dr. Dr. h.c. Schapour Zafarpour as a thank for his critical review of my first August 2011 paper destined to answer the question where we all come from and where we are all heading to ... To my ally and good acquaintance o.Univ.-Prof. Dipl.-Ing. Dr. Dr. h.c. Udo Wagner as a sign of eternal gratitude for the hint to use Prospect Theory in my 1st Thesis and for his last suggestion of a narrow subject-position of the present work contents that led to a multidisciplinary Védas of all Védas." Author: Andraž Pibernik, MSc.

See next page for some pictures!

Picture 2: MSc. Andraž Pibernik

Dr. Marc Seifer: Any form of acceleration (such as a g-force) is really a manifestation of the ether impressing itself upon the material body. "The ether tries to return itself to the initial state by compressing our world, but intrinsic electric charge within material world substance obstruct[s] this."¹³

Sphere design by Al Zeeper

106 *Ether Theory* ...
ang v (Heat) ang ω

Gravity, from this point of view, is not a pulling force, caused by an attraction of large planetary bodies, but rather is caused by the ether itself pushing down on the Earth as it makes its way through the cosmos. What we call gravity, according to Shapkin/Tesla?, is the "universal compression" of ether. Its presence and great density is what limits
