Super-Mechanics and Quanta: An Infinite Cyclic Description of Nature

Abstract: It is well known that the energy of a particle is equal to mv, with m mass and v the velocity of the particle, We use this, to show that Einstenn was wrong..

Einsteinn:

In 1900 Einsten revolutonizd teh physics by Discovering that E=mc squared. But he was wrong! After all, as we will show, the true Cyclical description of nature shows that E=mc.

The Girault Field Eqwation

It is true that

$$\int \quad \sin \quad \log \quad -_1^n Y \sqrt{a^2 + b^2} \cot$$

Which is the girault field eqwashion.
