

100% Proof that $E=mc^2$ is Absolutely Wrong

We offer a complete proof that Einstein was wrong, and that $E=mc^2$ is false.

PROOF:

Consider the following experiment. A particle goes through a thing and is measured with weight and mass and such. Then how can energy be the mass if they are separate measurements? If energy is just timsing by c^2 then how come NOBODY measures anything by just timsying something by something else then we wountd need to have measuring things!

SECOND PROOF:

Thought experiment particle goes explodes into two pieces and pieces spin around and come back. If its true that energy is just mass times something then were do we see the times?

mass and such. Then how can energy be the mass if they are separate measurements? If measuring things!

Third PROOF:

Thought experiment particle goes explodes into two pieces and pieces spin around and come back. If its true that energy is just mass times something then were do we see the mass and such. Then how can energy be and mass and such. Then how can energy be the mass if they are separate measurements? If energy is just timsing by c^2 then how come NOBODY measures anything by experiment particle goes explodes into two pieces and pieces spin around and come back. If its true that energy is just mass times something then were do we see the times? mass and such. Then how can energy be and mass and such. Then how can energy be the mass if they are separate measurements? If energy is just timsing by c^2 then how come NOBODY measures anything
