

Karma, the past and the history

I was born not knowing and have had only a little time to change
that here and there.

Richard P. Feynman

In this Research we will study Karma of Collective Human Conscience by mathematical methods. There are many works related to the same topic including famous physicist Richard Feynman.

Our study is based on the concept that Human Conscience is Information, hence it is a Wave function that obeys Schrödinger Equation.

Collective Human Conscience (all Wave functions of all people) forms some Set in some enclosing Hilbert Space of such Wave functions.

This Human Set is compact since it is bounded by Universe.

Maxwell Equations are those that describe the propagation law of Human Conscience over time.

There is Divine Conscience Set that lies in the same Hilbert Space. In general the Divine Set has no intersections with Human Set. Hence People have no visibility and knowledge about Divine Set. As we said every person conscience propagation over time is a solution of Maxwell Equations.

It is known that Maxwell Equations give rise to two symmetric solutions.

The second solution is a symmetrical solution in time of the first one.

For Human Conscience it means the Echo that comes from Divine

Set.

This Echo is a Mark if at given moment Human Conscience Wave (information that comes towards Divine Set) is good or bad.

Divine Conscience is Love hence good mark means that Human Conscience gave Love at the particular moment and bad means that it destroyed Love.

Hence over the time every person Wave function (information) is marked with such two bits: bad or good, forming kind of a tail for a person.

For the particular person let us call it Karma.

For Society or Human race we can call it Collective Karma.

There should be the start of such Collection of Bad and Good marks.

In the history of people everyone knows such Starts:

it is when Messenger from Divine Set comes to Human Conscience.

In modern history those Starts were when Buddha, Jesus and Muhammad came to Earth (to different parts of Earth and at different time).

One can ask why they came at different times?

Obviously people in those parts of Earth were at different Conscience Level.

In the Research we take as an axiom One Fundamental Law: Growth of Conscience.

Hence at some point of time Collective Human Conscience meets Divine Conscience, ie there happens intersection.

At this point, People have a choice to join Divine Set or not to join.

To join Divine set Collective Human Conscience needs to withdraw the “tail” or Bad information, ie remove Karma since Divine Set accepts only Good information.

In theology this is known as Katarsis.

And in everyday life it is known as Mill.

Pic. 1 shows schematically the concepts described.

Collective Human Conscience (Human Set) is located on the left.

Divine Set is located on the right.

He is in the Center, He is Love.

He is who sees All.

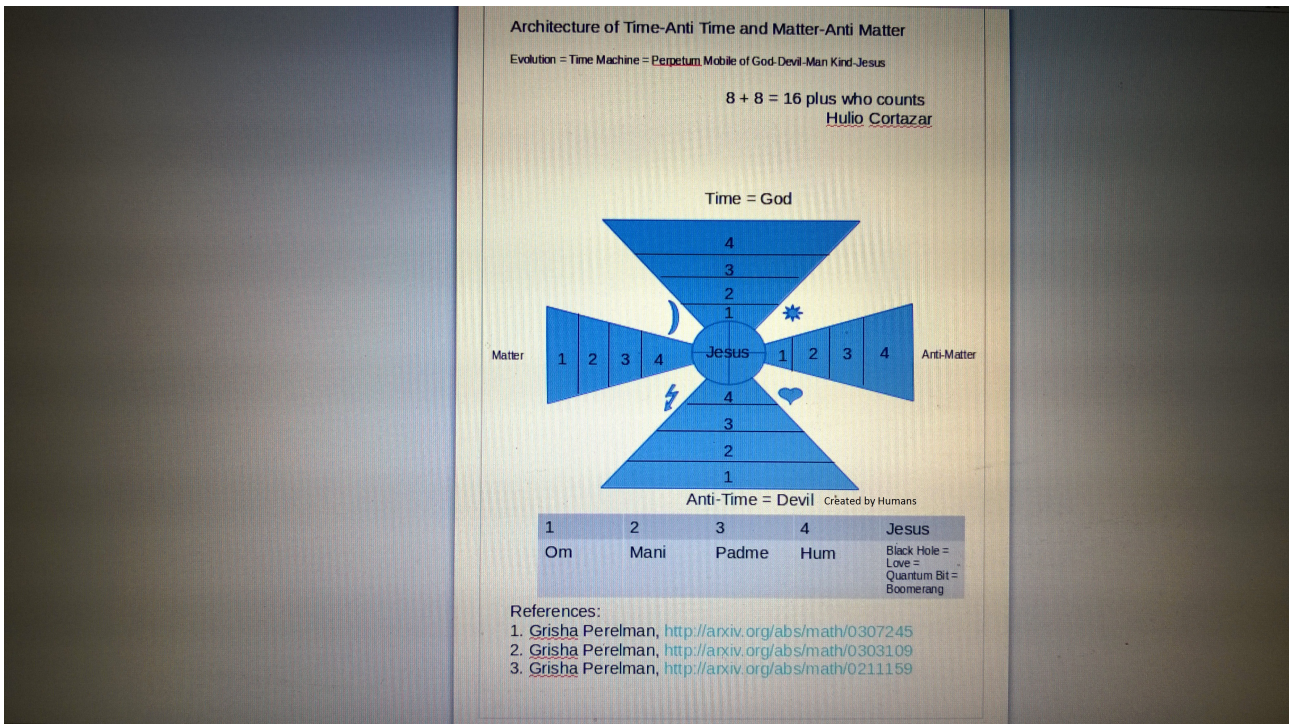

Karma is located below and in fact is Time with minus sign.

That is why People die.

In Divine Set on the right there is no death since They removed Karma.

In Divine Set there is only constant Conscience growth.

The Good Information, ie All Conscience Collective Love is located above.
