HYPOTHESIS OF ILLUSION OF THE FLAT FORM OF THE UNIVERSE

The Universe is limited and ordered, galaxies have arisen in the course of galactic disintegration of the Universe, the Universe can't have the flat form.

HYPOTHESIS OF ILLUSION OF THE FLAT FORM OF THE UNIVERSE

The Universe is limited and ordered (1). Galaxies have resulted from galactic disintegration of the Universe (2). Galaxies "run up" with acceleration only to Universe border, and there their movement is slowed down and, finally, they disappear in a gravitational cover (3). Our Universe conditionally is in "a soap bubble" (a black hole) and therefore can't be flat.
