

The axiomatic pattern of prime numbers

Ihsan Raja Muda Nasution

September 13, 2017

Abstract

In this paper, we analyze the behavior of prime numbers.

MSC: 11A41

Keywords: prime numbers, distribution of primes

1 Introduction and results

In 1859, Riemann [Rie59] computed the distribution of primes. Our motivation is to axiomatize the structure of primes. We have the following postulate.

Postulate 1. Let p be a prime number. Then:

1. 2 is prime.
2. $p^0 = 1$.
3. $1 \mid p$.
4. $0p \in \mathbf{N}$.
