Abstract

The purpose of this paper is to suggest the logical progression of merging Frequency to Spacetime. (Frequential Spacetime)

I. Frequential Spacetime

The frequency of matter dictates the shape of space and speed of the entanglement of matter. Frequential Spacetime speed of matter is less than 299,792,458 m/s^2 and Time Flows forward on the Y axis can be proportionate to Space and Frequency or it can be disproportionate where Speed of Matter is greater than 299,792,458 m/s^2 and Time on the Y axis Flows backwards and is Disproportionate (Inverse) to Space and Frequency. Note: Einstein Speed of Light = 299,792,458 m/s^2 and Tesla Speed of Light =470,674,159 m/s^2 but in arXiv:1303.0614v1 quantum entanglement was calculated at 10,000 times the speed of light at 2.99792458E12 m/s^2 or 2,997,924,580,000 m/s^2.

II. Einstein and Tesla

Einstein merged Space with Time hence Spacetime. Tesla has a Unified Theory based on Fields and Electromagnetism. The logical progression is to merge the two and suggest Frequential Spacetime in which the frequency of matter dictates the shape and speed of entanglement of matter in Spacetime. (see table below)
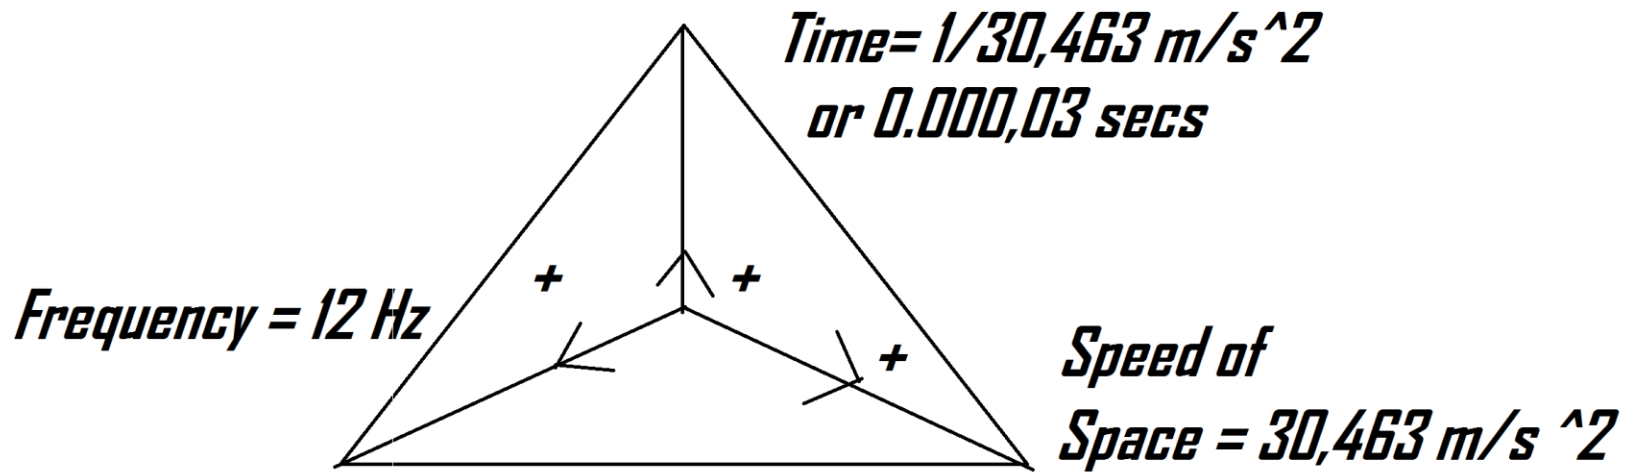

III. Frequential Spacetime Graph
In the Frequential Spacetime Graph there are 3 Axis. (X,Y,Z) X= Speed of Space, Y= Time and Z= Hertz.

Frequential Spacetime

Matter Type	Matter shape	SPACE	SPEED	HERTZ	INVERSION	Time Flow	GRAVITY
