REMINDER ON THE EXCLUSIVE HYPOTHESIS

So how much longer do we have to "unwind" the term of God?

On the Internet information that the former employee of CIA possesses information which can change idea of Earth and of ourselves has appeared. He claims that the mother Earth is only prison base where send the humanoids who have committed various crimes, and each of us only the prisoner of this prison.

This statement is confirmation of our exclusive hypothesis "So how many to us still it was necessary "to wind off" God's term?". The Earth's surface is a location of one of colonies the bogoneposlushnykh of individuals of the Universe!

God has chained disobedient people of Earth in shackles to fence off from the bogoposlushnykh вселеня, and has lodged them on the Earth's surface where various cataclysms rage: droughts, icy colds, floods, space threats and so on. Quite another matter – paradise life in the planet where the kernel turns into the artificial sun, and the cloak gives way to the artificial atmosphere. There dreams of paradise life where eternal summer, always light, gardens blossom and fructify come true, there are no space threats, the love reigns everywhere, there are no theft and alcoholism where all – one family, brothers and sisters.

We are sure that our Universe live! Alas, "they", perhaps, only send to us the UFO to investigation – but whether we have done something superfluous? Nobody in the Universe wants to communicate with us! Would send though a news!
