

Dear Sir/ Madam,

The attachment contains an election manifesto 2019 prepared by me.

I am a research scientist in mathematics, physics, cosmology, alternative yoga, alternative medicine and spiritual philosophies.

The fifth Euclidean postulate is 2300 years old mathematical impossibility. I have worked on this problem for more than 30 years and found a number of solutions. My results were accepted by international scientists and published in professional peer reviewed research journals.

Recently, I have invented that the shape of our universe is FLAT.

For more details on my scientific discoveries, please visit the following web-link:

vixra.org/pdf/1801.0146v1.pdf

Kindly acknowledge receipt of this mail.

Thank you.

Yours Sincerely,

S. Kalimuthu
